Minimum System Requirements

Before installing PCSec please check that you meet with the minimum system requirements below.

- Windows Vista, Windows 7, Windows 10 operating system
- Microsoft Data Access Components 2.8 (MDAC 2.8) or higher
- Microsoft Jet 4.0 Database engine (JET 4)
- .NET Framework Version 2.0 (or ability to install)
- Minimum 245 MB of available random-access memory (RAM). 512 MB or more is recommended
- Minimum 512 MB of available disk space (dependent on the number of companies administered)
- A CD-ROM drive
- Any Windows compatible printer which produces laser quality output and has a minimum of 1 MB of internal members. The printer should be PCL compatible
- Any Windows compatible network such as Novell or Windows (for multi-user installations)
- Adobe Acrobat Reader 8 (or later), or Adobe Acrobat Professional 8 (or later)
- Microsoft Word 2010 2016
- An internet connection using Internet Explorer 7.0 or later
- A Companies House online filing credit account (if using electronic filing)

Installation Instructions

From the client PC launch Windows Explorer and navigate to the PCSec installation on your server.

Locate the \Winsec32\Database\Setup folder, this is where the local install file **PCSecClient_setup.msi** resides.

Organize 🔻 👘 Install	✓ New folder

Once located, double-click to launch the installation package. Click $\underline{N}\text{ext}$ > to continue.

跨 PCSec 6.0 Client Setup	
Jordans Limited PCSec 6.0 Client	Advanced Installer Setup
Welcome to the PCSec 6.0 Client Setup Wizard	
The Setup Ward will instal PCSec 6.0 Client on your computer.	PCSec visit our websites for the latest news and information.
Click "Next" to continue.	
	<back next=""> Cancel</back>

Input the installation location. Note this should be either

- C:\Winsec32\ or;
- C:\Program Files (x86)\Winsec32\

(We don't recommend that PCSec is installed to C:\Program Files\ as this can cause issues with virtualisation of the database)

Click <u>N</u>ext > to continue.

In this screen ensure that

Jordans Limited First Floor, Templeback, 10 Temple Back Bristol, BS1 6FL, United Kingdom Tel: +44 (0)117 9230600 Fax: +44 (0)117 9230063

Under the Document Creations section:

Type of document is set to Docx for users of MS Word 2010 or MS Word 2013; or Type of document is set to Doc for users of MS Word 2007

Under the Folders section:

Database – Points to the Winsec32\Database\ folder on your server Forms – Points to the Winsec32\Forms\ folder on your server Paras – Points to the Winsec32\Paras\ folder on your server Spool – Points to the Winsec32\Spool\ folder on your server

(If using mapped drives, please ensure that these are correctly mapped and labelled. Alternatively PCSec can accept the full UNC path)

Click Save to save the settings and exit.

User Setup & Signon

To create a new user log on, an existing Administrator of user PCSec needs to sign in and set them up.

In PCSec go to Utilities and select User Setup.

User Setup	Name Annu Days
User Names DELET	TE ME
Details	
User ID	TEMPUSER
User Name	DELETE ME
Authority	Administrator
Date Password last changed	22 Apr 2015 Reset Password to User ID
Add Delete	<u>U</u> pdate
	E <u>x</u> it <u>H</u> elp

To create a new user click <u>A</u>dd.

- Enter a User ID (maximum 8 characters alpha/numeric)
- Enter the full User Name
- Select an Authority level

There are three levels of Authority within PCSec:

Read-only: for users who need access to the information recorded in PCSec but who have no responsibility and/or authority to maintain the information.

Update: for operators of the system who are responsible for carrying out the day to day work. These users will be unable to delete companies or personnel from the system. They will also be unable to save System Preferences.

Administrator: full system access.

Company Secretarial Software

User Setup	5an 480 5ar
